Graded Exercise

Web Engineering
Prof. D. König
C. Ribeaud

Graded Exercise Overview

Single-person activity

Bring-your-own idea or "team-staffing"

Delivery format: Grails app in github

Graded Exercise Timeline

19.11. Commit proposal (template)

Open Issue for @Dierk to confirm

22.11. Me confirming proposal (git commit)

20.12. (inclusive) Delivery Deadline

17.01. Grading via git commit

Single User Activity, allowed

Using code from course material

Using code from w3schools / tutorials

Using external dependencies

Discuss with others, getting help

Clear Demarcation

**EXTERNAL CODE
CAN BE USED
BUT MUST BE
CLEARLY MARKED**

External Code Markers

As appropriate:

- comments in code
- extra commit with comment

Include the word "EXTERNAL" and the origin

Grading Scheme

See the spreadsheet for details.

Max. 50 points

Grade: 1.0 + points/10

Cheating attempt => 1.0

We Use Git

All communication is done in git.

We work in the github ***classroom*** repo.

We work on the ***master*** branch.

Use Git Wisely

Commit early, commit often

Putting all of your solution in a single commit would be extremely suspicious

20 min rule

Work seriously for 20 minutes on the issue.

After that: *ask*!

- Github issue with @Dierk
- Want I want to achieve
- What I tried and how it failed
